

# **CITY OF EDINBURGH COUNCIL**

# 06 FEBRUARY 2015

#### POLICE PERFORMANCE REPORT FOR EDINBURGH: APRIL 2014 – DECEMBER 2014

#### 1 SUMMARY

- 1.1 The purpose of this report is to highlight Police performance in the City of Edinburgh and provide further detail on issues such as emerging trends, threats or particular successes and areas of concern.
- 1.2 The Edinburgh Policing Performance Scrutiny Report table contains the current information on performance against selected performance indicators. This covering report provides complementary information to ensure a rounded picture of issues affecting policing in the city.
- 1.3 The format of this report generally follows that of the Local Policing Plan priorities (i.e. Violence/Disorder & ASB, Serious Crime, Domestic Abuse etc) as they appear on the Scrutiny Report table.
- 1.4 The colour coding on the table is intended to provide a visual representation of variations in performance. It is based on the following protocol:
- 1.5 Column 3 –

Green: performance better than previous year.

Red: performance worse than previous year.

Amber: either no or very limited variation in performance either way compared to last year – often such variations are anticipated fluctuations which routinely occur in the normal course of business.

The numbers in the fourth column show previous year data; and in the seventh column show figures for the 3/5 year average depending on the amount of data available.

#### NOT PROTECTIVELY MARKED

1.6 There will normally be contextual information provided on current performance which shows significant improvement or reduction against that achieved previously.

#### 2 OFFICER RECOMMENDATION

The Committee is invited to:-

2.1 Note the contents of this report and the associated tables and make known any issues for consideration of action by Police Scotland.

#### **3 CRIME GROUP DEFINITIONS**

For clarity of understanding, the following is a breakdown of the main crime types contained within the groups (this list is not exhaustive):

3.1 Group 1 Violent Crime

Murder, Culpable Homicide, Attempted Murder, Serious Assault, Robbery, Threats & Extortion, Cruel & Unnatural Treatment of Children, Abduction

3.2 Group 2 Crimes of Indecency

Rape, Assault with intent to rape / ravish, Indecent Assault, Sexual Assault, Prostitution related crime

3.3 Group 3 Crimes of Dishonesty

Housebreaking, Opening Lockfast Places, Thefts from and of Motor Vehicles, common Theft, Theft by Shoplifting, Fraud

3.4 Group 4

Fireraising, Vandalism, Reckless Conduct (with and without firearms)

3.5 Group 5 Other Crimes

Possession of Offensive Weapons, Carrying of Knives, Supply & Possession of Drugs, Other Drug Crimes (inc importation and production)

3.6 Group 6 Miscellaneous Offences

Minor Assault, Breach of the Peace, Threatening & Abusive Behaviour, Stalking, Urinating, Racially Aggravated Conduct / Harassment, Drunk & Incapable

3.7 Group 7 Offences Relating to motor Vehicles

Dangerous and Careless Driving, Drink/Drug driving offences, Speeding, Driving while disqualified, Driving without a licence, Failure to insure, Seatbelt and mobile phone offences.

#### 4 DETAILED OVERVIEW

- 4.1 Overall crime rates have decreased in this reporting period by 1.4% on LYTD, equating to 311 fewer victims of crime. Within the individual crime groups, Group 1 crimes of violence have increased by 2.2% against LYTD but decreased 20.0% against the 5-year average. Group 2 (Crimes of Indecency) has increased by 5.9% and Group 3 (Crimes of Dishonesty) has fallen by 1.4% against LYTD.
- 4.2 The 44 performance indicators currently used in the table reflect the aspirations of Edinburgh Division to achieve continuous improvement in service delivery to the communities in this area.
- 4.3 They contain information produced by Police Scotland, which is relevant to national priorities and also reflects the objectives in the Edinburgh Local Policing Plan.
- 4.4 Together, they help to provide information on trends in performance that is expanded by the contextual information and actions shown in the final column. The scrutiny table provides detail of how significant the variations in performance were, and whether it varied in respect of the previous year or the 5 year average or both.
- 4.5 Instances of **disorder** have increased by 24 incident compared to LYTD.
- 4.6 In respect of **violent crime**, there is currently a decrease of 4.8% in serious assaults with 10 more victims. The number of robberies YTD (242) represents 29 more victims on LYTD, and is an increase of 13.6% against the previous year and a 12.4% reduction against the 5-year average. Please note that the definition of robbery has changed since last year making direct comparison challenging. Detection rates for serious assaults have decreased by 6.98% YTD with 354 fewer victims and a current detection rate of 62.5%.
- 4.7 Offences involving the **supply of drugs** have decreased by 43.9% YTD and **possession of drugs** offences have increased by 21.5% YTD. It can be expected that the continued use of intelligence led stop and search activity as a tactic to disrupt, detected and deter crime will see this rise in the forthcoming months.
- 4.8 **Crimes of dishonesty (Group 3)** have decreased by 1.4% overall against LYTD and by increased by 3.3% against the 5-year average. Domestic dwelling housebreakings have decreased by 8.2% against LYTD, equating to 128 fewer victims. It is acknowledged that there is a 13.4% increase in motor vehicle crime compared to LYTD driven by theft and attempt theft of motor vehicles. This is an improvement on the 15% increase reported last quarter.
- 4.9 The detection rate for acquisitive crime is 24.9%, representing a decrease of 3.9% against LYTD and 7.4% against the 5-year average. However, following the success of Operation RAC last year E Division has continued to perform very strongly in respect of domestic dwelling housebreakings with a current detection rate of 35.6%, an increase of 11.1% against LYTD.
- 4.10 The number of **domestic abuse incidents** (4,276) shows an increase against the previous year (4,111), of 4.0%. A detection rate of 79.9% for

# NOT PROTECTIVELY MARKED

crimes of domestic abuse highlights the continued emphasis and focus placed on the investigation into crimes of this nature.

- 4.11 **Road Policing and Road Crime** continues to be addressed by Community Officers augmented by officers from both the local Edinburgh Divisional Road Policing Unit and the national Trunks Road Policing Group. The number of people killed on the roads within E Division has increased by 100% against LYTD with eight fatalities recorded. The number of people seriously injured has decreased from 112 to 109 (-2.7%) against LYTD.
- 4.12 Reports of crimes of indecency, within the **Public Protection** category, have increased from 657 LYTD to 696 YTD, representing a rise of 5.9% against LYTD and 19.5% against the 5-year average. A YTD detection rate of 71.0% equates to 494 of the recorded 696 crimes being detected. Within the Group 2 crimes, rape detection is currently 71.1% with 96 of the 135 recorded crimes being solved.
- 4.13 **Hate crime** detection is currently 68.1%, a slight decrease of 5.6% against LYTD. A review of the process around the investigation of hate crimes within the Division has resulted in increased scrutiny and management. Weekly analysis maximises investigative opportunities which will see this detection rate increase.
- 4.14 **Community Confidence and Engagement** remains at the heart of local policing, and the **number of complaints about the police** and the nature of such complaints can be a measure of how well this is being achieved.

#### 5 RISKS AND THREATS

- 5.1 Some of the risks and threats which continue to be present are:
  - Increased private space violence and robbery,
  - Theft of and from motor vehicles,
  - Increasing prevalence of New Psychoactive Substances,

Edinburgh Division continues to focus on intervention and enforcement to address the above issues through the work of the Divisional Violence Reduction Unit, Community Policing Teams, Community Investigation Units and the Police Scotland flexi teams. In addition, pro-active CID place a heavy emphasis on serious and organised crime.

#### 6 RECENT OPERATIONAL UPDATES

6.1 Operation Wolf – referred to within Appendix 1, was an operation supported by City of Edinburgh Council which saw Police officers across the Division take part in various enforcement days throughout the year. This operation targeted those involved in violent crime, anti social behaviour, drugs, hate crime and domestic abuse.

## NOT PROTECTIVELY MARKED

Operation Wolf continues to be repeated providing days of action focusing on key areas within the city to challenge offenders.

| 1     | Total No Group 1: Crimes<br>of Violence   | 664                          | 650                          | 14 more   | 2.2%                                | 829.6             | Context: The increase in Group 1 crimes is driven by increases in<br>the Cruel and Unnatural Treatment of Children (+29.2%), Robbery<br>(+13.6%) and Serious Assault (+4.8%).<br>These are offset by reductions in murder, attempt murder,<br>culpable homicide and abduction (collectively 27 fewer victims).<br>Cruel and Unnatural Treatment of Children are predominantly pro-<br>actively identified. They are also recorded in a victim led manner<br>so that if a parent leaves 3 children home alone, three crimes are<br>recorded and not one. This is likely to be under-reported and an<br>increase in identified offences suggests that this year we have<br>made more positive interventions in the lives of vulnerable victims.<br>The ultimate disposal for these offences, whilst also carrying<br>potential criminal sanctions, tends to result in diversion to social<br>services to help improve the quality of young peoples' lives.<br>Serious assault and robbery are discussed in more detail below.<br><b>Standard Actions</b> : Group 1 crimes of violence are scrutinised on<br>a daily basis and at present there are no clear trends. The<br>Criminal Investigation Department has primary responsibility for<br>the scrutiny and investigation of such incidents.<br><b>Further response:</b> Operation Wolf, supported by City of<br>Edinburgh Council, saw Police officers take part in various<br>enforcement days throughout the year, targeting violent crime,<br>anti-social behaviour, drugs, hate crime and domestic abuse.<br>Operation Wolf continues to run using "days of action" target<br>specific areas of the city. |

|-------|------------------------------|------------------------------|------------------------------|---------|-------------------------------------|-------------------|---|
|       |                              |                              |                              |         |                                     |                   |   |
| No.   | Performance Indicator        | Apr<br>2014-<br>Sept<br>2014 | Apr<br>2013-<br>Sept<br>2013 | Victims | %<br>Change<br>from<br>last<br>year | 5 Year<br>Average | Context and Actions/Response  |
|       |                              |                              |                              |         |                                     |                   | <ul> <li>majority of serious assaults continue to occur at the weekend,<br/>mainly linked to the consumption of alcohol.</li> <li>Standard Actions: As Section 1 above.</li> <li>Further Actions: As Section 1 above. The management of high<br/>tariff violent offenders and circulation of priority locations, along<br/>with partnership working, will aim to reduce the frequency of<br/>private space assaults. This is managed by a dedicated team of<br/>officers in the Edinburgh VOW unit.</li> </ul>  |
| 8     | Robbery detection rate       | 74.0%                        | 70.9%                        |         | 3.1%                                | 51.3%             | <ul> <li>Context: As section 6 above, with the exception that detection rates range from 63.6% in Central to 82.8% in South. Robbery detection rates have increased over the last quarter despite an increase in the number of private space robberies.</li> <li>Standard Actions: As Section 1 above.</li> <li>Further Response: As Section 6 above.</li> </ul>  |
| 9     | Robbery                      | 242                          | 213                          | 29 more | 13.6%                               | 288.6             | <b>Context:</b> This category also includes assault with intent to rob.<br>The increase of 13.6% is driven by increases in North, South and<br>East. Street robberies account for the largest proportion (57.8%),<br>followed by private space robberies which account for 23.0% of all<br>robberies. The definition of robbery for crime classification<br>purposes has changed since last year which broadens the criteria<br>of behavior classified as robbery. This resulted in crimes being<br>recorded as robberies which in previous reporting periods would<br>not have been.<br><b>Standard Actions</b> : Crimes of robbery are scrutinised closely and<br>subject to focused investigation. The Criminal Investigation<br>Department has primary responsibility for the investigation of such<br>incidents and detection rates are consistently high. |

| Viole | nce, Disorder & Antisocial E          |                              |                              |           |                                     |                   | to 30 September 2014   |  |

| Protecting the Public |  |                              |                              |         |                                  |                     |   |
|-----------------------|--|------------------------------|------------------------------|---------|----------------------------------|---------------------|---|
| No.                   | Performance Indicator                      | Apr<br>2014-<br>Sept<br>2014 | Apr<br>2013-<br>Sept<br>2013 | Victims | %<br>Change<br>from<br>last year | 3/5 Year<br>Average | Context and Actions/Response  |
| 38                    | Number of Group 2 -<br>Crimes of Indecency | 696                          | 657                          | 39 more | 5.9%                             | 582.2               | Context: The rise in Group 2 crime can be attributed to<br>confidence in reporting of sexual offences and the pro-active<br>investigation of offending histories has led to an increase in<br>the recording of historic sexual offences. In the majority of<br>crimes of indecency, the victim knows the perpetrator – the<br>number carried out by strangers remains extremely low.<br>Standard Actions: All such crimes are investigated with the<br>same thoroughness regardless of when they were committed.<br>The Public Protection Unit oversees all crimes of indecency<br>and these are scrutinised daily to progress the investigations<br>expeditiously and appropriately.<br>Further Response: Extensive partnership working has taken<br>place and is ongoing within Edinburgh around the vulnerability<br>of persons as a result of alcohol consumption and the city<br>centre nighttime economy. |
| 39                    | Group 2 crimes detection rate              | 71.0%                        | 69.9%                        |         | 1.1%                             | 65.1%               | <b>Context:</b> The detection rate has increased compared with last year and in comparison to the 5-year average. Such is the nature of reporting, as detailed above, enquiries can be protracted and detection rates can fluctuate month to month, influenced by the historical reporting aspect.<br><b>Standard Actions:</b> As Section 38 above.   |
| 40                    | Rape detection rate                        | 71.1%                        | 64.1%                        |         | 7.0%                             | 48.6%               | <b>Context:</b> Detection rates are strong in this crime type and exceed LYTD and significantly exceed the five year average. <b>Standard Actions &amp; Further Response</b> : As 38 above  |

| No.                | Performance Indicator                        | Apr<br>2014-<br>Sept<br>2014 | Apr<br>2013-<br>Sept<br>2013 | Victims | %<br>Change<br>from<br>last year | 3/5 Year<br>Average | Context and Actions/Response   |  |
| 41                 | Hate crimes and offences<br>– detection rate | 68.1%                        | 73.7%                        |         | -5.6%                            | NDA                 | <ul> <li>Context: This detection rate is a reduction of -5.6% on LYTD. The promotion of third party reporting and increased confidence in reporting may explain some of this discrepancy. A hate crime is categorised in respect of personal characteristics, being disability, race, religion or belief, transgender identity and sexual orientation.</li> <li>Standard Actions: Hate crime within Edinburgh is monitored by the Prevention, Intervention and Partnerships team who provide a conduit between the victim and representative groups should that be required. Victims of hate crime can be amongst the most vulnerable persons in the community, and investigation of such crime receives particular focus. All hate crimes and incidents are recorded on the Vulnerable Persons Database ensuring appropriate measures of care and intervention are in place.</li> <li>Further Response: Additional support to victims of such crime is often an important element of the response. Crime reports can be further scrutinised by lay advisors to ensure appropriate enquiry and action is taken and necessary consideration given to the victim in respect of welfare and vulnerability. Hate Crime management analysis is carried out weekly to maximise investigative opportunities and to ensure appropriate recording in compliance with guidelines.</li> </ul> |  |
